

How to work out the value of your car

It's a good idea to do an annual check on the retail value of your car. For starters, your car depreciates in value every year, which means you could be over-insured, so your insurance premium may be higher than it needs to be. On the flip side, and this is where the nasty surprises can happen, you may be under-insured. No one wants to find that out when they have to claim.

Our online calculator can work out an estimated retail value of your vehicle. There are 3 simple steps to follow:

Step 1: Guess how much you think your car is worth.

Step 2: Provide us with information about the make and model of your car.

Step 3: The result.
